

# FORUM PARKWAY SUCCESS STORY

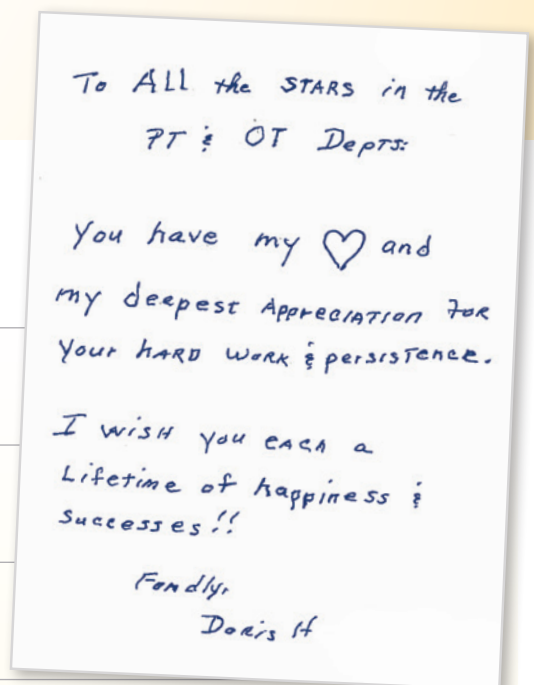

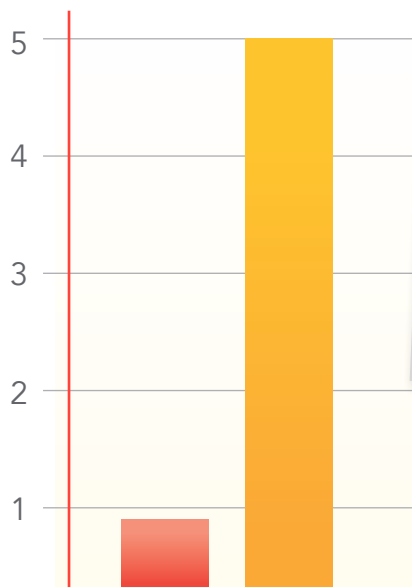

**Mrs. Doris H.** was admitted to Forum Parkway after hospitalization for five days due to increased weakness, atrial fibrillation and hypoxia. She required moderate-maximum assistance with activities of daily living, bed mobility, and transfers.

As a result of our physical and occupational therapy services, Mrs. H. progressed to modified independent with all functional mobility, transfers, and ambulation with a rolling walker, as well as only needing supervision level of assistance for activities of daily living.

**She successfully discharged home three weeks later with a low risk of falling and no help required from her family as initially planned. She also left us a very kind thank you card expressing gratitude for the help during her stay!**

## Mrs. H's Residential Mobility Outcomes
